

Thanks for Choosing KryKey Internet Radio to Broadcast to the World!

This is your “How to Use Your Personal Internet Radio Station”, and it is a great help with information and screen shots of the Studio and related areas to help you get the best out of your PRS. Please read this as it has most of what you need to know in it.

Instructional videos are also on YouTube:

Plus -

(0) VERY IMPORTANT:

**PLEASE CHECK IN THE MAIN MUSIC LIBRARY BEFORE YOU UPLOAD AND MUSIC AS IT MIGHT ALREADY BE IN THERE;
THE MUSIC LIBRARY IS FOR MUSIC ONLY, NOT FOR PODCASTS;
PROMOS ARE TO GO IN PROMO LIBRARY;
PODCASTS IN PODCAST LIBRARY;**

1) Radio Station Name: this can be changed anytime in the Administration section of the Studio, as can the email address, so no need to create a new radio station just to have a new name.

2) Uploading Songs: it is VERY IMPORTANT that you have the SONG NAME, ARTIST, ALBUM, YEAR and GENRE tags filled in for each song as these are required for several reasons and one most important one is if a listener is searching for a song, artist, etc these are the tags that are used and they won't be able to find your radio station. A FREE program to do this can be downloaded at <http://www.mp3tag.de/en/download.html>

3) Upload Limits: The current maximum file size of a song is 12Mb and only in MP3 format. As we only stream at 320Kbps, the songs should be converted to this Bitrate and then the file size will be under the 12Mb for 98% of all songs. For those who need to upload a larger size, we offer a 'File Size Option' (FSO) which will be covered by a subscribed monthly fee. Podcasts are currently limited to 120Mb each. The FSO will also cover large Podcast file sizes. FSO upload limit will be 80Mb per file Song or Podcast. Pay for one month or get a great discount by paying for 12 months. A FREE program to recode can be downloaded at <http://www.dvdvideosoft.com/free-dvd-video-software-download.htm>

4) Boosting Your Listener Numbers: just a warning that we have a program running that looks at listener numbers and if they are artificially boosted your radio station will be deactivated.

5) Terms of Service: Please read the Terms of Service (select 'legal' link at the bottom of the KryKey.com main page

Finally, we are working on the next version (3.0) and it will have more features and changes and we will be launching it later early 2011.

Please continue to learn “How to Use Your Personal Internet Radio Station”

How to Use Your Personal Internet Radio Station (PRS) Studio

Your Personal Internet Radio Station Studio (PRS) is the place where it all happens! This is where you add: music, promos, news, adverts, and Podcasts to a Playlist. You can also talk "live" to your listeners. Invitations to other users (as DJ's), and reports on your PRS' statistics are also managed here.

In this tutorial we will help you master the basics of your PRS Studio, and explain all the features available to you. As we add new features this tutorial will be updated! Even though it looks a bit complicated when you first sign in, it is very easy to use and operate! Within a few minutes you will be up-and-running and broadcasting your music and content to listeners all over the Internet! Tutorials are also on *You Tube* (search for *KryKey Web Radio*) and our *Facebook Fan Page*.

So let's get started!

Once you have signed into your Personal Internet Radio Station (PRS) Studio, you will see an interface similar to the Studio screen shot below: Once you have signed into your Personal Internet Radio Station (PRS) Studio you will see your Studio like in the screen shot below.

TIME/DATE	TRACK NAME/PLAYLIST NAME	ARTIST	ALBUM	AUTHOR	DURATION
07/04/2009 20:21:26	US Top 40 11 July 2009			Red Babe	02:51:17

	You're A Jerk	New Boyz	VA - Top 40 singles - US		03:51

As you can see in the screen shot, the new Studio is made up of four distinct areas. The first navigation area (shown below) is called the “Studio Button Strip” (SBS). The SBS also has nine buttons..

These 9 buttons are:

1. Sound Library – the Sound Library contains all the music, Podcasts, Promos, Adverts and News that you have uploaded. It also contains the music library with all files that have been shared by other PRS-operators. This is called the KryKey Music Library (KML) [\[click here for more details\]](#)
2. Upload Songs – this is where you **upload songs (only songs are to be uploaded only to this library)** into your “PRS Music Library” (SML) [\[click here for more details\]](#)
3. Playlists – Create a Playlist, edit a Playlist or delete a Playlist. You can have multiple Playlists. Playlists have the option of being ‘shared’ so other PRS can play it. (PLL) [\[click here for more details\]](#)
4. Podcast – **Upload your Podcasts** to your “Studio Podcast Library” (PCL) [\[click here for more details\]](#)
5. Promos – **Upload your Promos** to your “Studio Promotions Library” (PL) [\[click here for more details\]](#)
6. Adverts – **Upload you Advertisements** to your “Studio Adverts Library” (AL) [\[click here for more details\]](#)
7. News – **Upload your Newsclips** to your “Studio News Library” (NL) [\[click here for more details\]](#)
8. Administration – This is the PRS Administration section which has where you can change the details and logo of your PRS [\[click here for more details\]](#), change the look of your PRS [\[click here for more details\]](#) and manage your DJs [\[click here for more details\]](#). This function is only available through Studio One (Owner), because the DJs use Studio Two. Studio Two does not have this button. [\[click here for more details\]](#)
9. Logout – Logout of your Studio and you will be taken to your PRS

The second navigation area only has four buttons, but has nine displays and a volume control as you can see in the screen shot below.

The second navigation area has four buttons, nine displays, and a volume control (as you can see in the screen shot below):

1. Play: starts "Playing" the items in your "Play/Schedule Area" (PSA)
2. Stop: stops playing the items in the PSA
3. Mic : turns the Microphone on or off
4. Line In: this is used to plug in an external source (like a mixer) to broadcast live shows select LINE IN and MIC to broadcast live (plug your external source into the Mic connection of your computer).
5. Time Display: this displays the current time (taken from your computer)
6. Studio Time: this displays how long you have been in the Studio
7. Number of Listeners: this displays the exact number of listeners that are currently connected to your PRS
8. Volume: this sliding volume control regulates the level of the broadcast in the Studio (not for the broadcast that listeners hear)

9. Last Track: this is colored red as this track (previous) has now stopped
10. Now Playing: this is colored green and displays the current track playing Next Track – colored yellow to warn you what track is next

The third navigation area is what is called the Play/Schedule Area (PSA) and this area as you can see in the screen shot below is the “hub” of the Studio as this is where it all happens.

TIME/DATE	TRACK NAME/PLAYLIST NAME	ARTIST	ALBUM	AUTHOR	DURATION
07/04/2009 20:21:26	US Top 40 11 July 2009			Red Babe	02:51:17
	Boom Boom Pow	Black Eyed Peas	VA - Top 40 singles - US		05:08
	I Gotta Feeling	Black Eyed Peas	VA - Top 40 singles - US		04:49
	Best I Ever Had	Drake	VA - Top 40 singles - US		05:36
	Knock You Down	Keri Hilson ft. Ne-Yo and	VA - Top 40 singles - US		05:25
	Love Game	Lady Gaga	VA - Top 40 singles - US		03:37
	New Divide	Linkin Park	VA - Top 40 singles - US		04:27
	You Belong With Me	Taylor Swift	VA - Top 40 singles - US		03:52
	Every Girl	lil wayne Ft young money	VA - Top 40 singles - US		04:56
	No Surprise	Daughtry	VA - Top 40 singles - US		03:59
	I Know You Want Me (Calle Ocho)	Pitbul	VA - Top 40 singles - US		04:00
	Poker Face	Lady Gaga	VA - Top 40 singles - US		03:59
	Birthday Sex	Jeremih	VA - Top 40 singles - US		03:47
	Old Times Sake (Ft. Dr Dre)	Eminem	VA - Top 40 singles - US		04:38
	Know Your Enemy	Green Day	VA - Top 40 singles - US		03:10
	1234	Plain White T's	VA - Top 40 singles - US		03:19
	You're A Jerk	New Boyz	VA - Top 40 singles - US		02:51

The PSA has three sections:

1. **Play & Schedule (PSA)** – this is where you “drag n drop” songs, Playlists, adverts, promos, podcast, sound effects, and news. You can also schedule them by clicking on the Time/Date column to the left of the name. You can set a date and time when to play. The blue colored section tells you this is a Playlist.
2. **Content** – these 7 tabs which are colored for easy identification slide out from the right. To close any of them just click the right hand side which is colored red.
 - [Sound Library](#) has the songs from your Studio Music Library (SML) and the KML (KryKey Music Library)
 - [Playlists](#) has the Playlists you have created and shared Playlists from other PRS
 - [Podcast](#) are in here that you have uploaded and shared Podcasts from other PRS
 - [Promos](#) help in letting your listeners know who you are and they are in here
 - [Adverts](#) that you have uploaded are in here
 - [Effects](#) are what we have added in here, and more will be added monthly
 - [News](#) that you have created and uploaded will be in here – in the future PRS can share News
3. **Communication** – click this and it slides up from the bottom and you will see to areas in here, (1) chat window and (2) scrolling text window. Both have different functions, the first one is used to communicate between the Studio and you PRS page with you listeners. It is a basic chat system which will let you clear the history and also change the name of the person in the Studio using the chat. The second one is for creating scrolling text messages with a maximum 140 characters which is seen on your PRS page. You can log into your Twitter account & Facebook and send these messages to them (Facebook goes on your wall).

** all technologies, concepts, designs on KryKey Internet Radio are copyright (c) 2006-2011 and are covered under US and EU law **

The fourth navigation area we haven't named, in fact we just call it the "bottom of the Studio" ☹️ But if you have a better name for it, please send it to us. So this area has eight displays and four buttons. The screen shot below is of this navigation area. Moving left to right the first display is 'when the next track starts', then we have a 'progress bar' for the current track being played, what is remaining of the current Playlist, and the 'total for hour'. The next level down the two displays that are first are for the current track, how much has been played and how much is left to be played.

1. Speaker – turns the speaker in the Studio on and off
2. Calls – a listener can call you from the PRS page. Once this call is started both you and the listeners can be heard over the air. You will know someone is calling you by a number appearing on the button
3. Clear List – if you want to remove anything from the Play & Schedule section, just click on it and then click this button. Want to get rid of everything? Just click the button without any selection.

We then have two more displays which are how long the PRS has been broadcasting and when the next scheduled Playlist or song is going to be played.

You can listen to our KryKey Internet Radio Demo radio station at <http://www.krykey.com/Radio/PRSPage.aspx?id=151>

THE END (sort off)

That was an overview of what was in the Studio. For some of you that will be enough. For some not so, and for others more in depth information is required later. Then you can finish now and get to playing with your new Studio and PRS, or you can keep reading.

But Wait There's More!

The next pages will give you more detail on how to use the Studio.

SOUND LIBRARY

The Sound Library is where all your content is. There are eight (8) sections in the Sound Library – *PRS Music Library, KryKey Music Library, Podcasts, Promos, Adverts, News, Sound Effects* and *Playlists*.

PRS Music Library (SML)

All the music you have uploaded and added from *KML* is in here. Screen shot below displaying this section of the Sound Library.

Very Important:

Please do not upload anything but songs into this library. There is a library for Promos, podcasts, adverts and news.

When you go to upload/add music to this library, if you get a message that it is *already in the KML*, this means that someone has already uploaded the song and you don't have to. All you need to do is go to the *KryKey Music Library (KML)* and find the song in there by using the search and then add it to your library (see *KML* after this section).

The screenshot shows the 'Sound Library' interface with the 'PRS Music Library' section selected. It includes navigation tabs for 'PRS Music Library', 'KryKey Music Library', 'Podcasts', 'Promos', 'Adverts', 'News', 'Sound Effects', and 'Playlists'. Below the tabs are 'Browse...' and 'Add to Music Library' buttons, and a 'share' checkbox. The main content is a table of songs with columns for Song Name, Artist, Year, Album, Genre, and Duration. Each row also has 'Unshare' and 'Remove' buttons. The table lists 11 songs, including 'We're From America' by Marilyn Manson, 'We Made You' by Eminem, and 'Beautiful Ft. Colby O'donis And Kardinal Offishall' by Akon. The interface also shows '<< Previous Page' and 'Next Page >>' navigation options, and 'Page 1 of 11' at the bottom right.

Song Name	Artist	Year	Album	Genre	Duration		
We're From America	Marilyn Manson	2009	We're From America	Hard Rock	05:04	Unshare	Remove
We Made You	Eminem	2009	Top 40 Uk Singles - June 7 2009	Top 40	04:48	Unshare	Remove
Beautiful Ft. Colby O'donis And Kardinal Offishall	Akon	2009	Top 40 Uk Singles - June 7 2009	Top 40	05:13	Unshare	Remove
Don't Think Of Me	Dido	1999	No Angel	Rock	04:32	Unshare	Remove
Don't Believe In Love	Dido	2008	Safe Trip Home	Pop	07:46	Unshare	Remove
Confidence Man	The Jeff Healey Band	1988	See The Light	Blues	03:15	Unshare	Remove
See The Light	The Jeff Healey Band	1988	See The Light	Blues	04:27	Unshare	Remove
Land Downunder	Men At Work	1980	Great Southern Land	Other	03:41	Unshare	Remove
Solid Rock	Goanna	1980	Great Southern Land	Other	04:30	Unshare	Remove
Treaty	Yothu Yindi	1980	Great Southern Land	Other	04:02	Unshare	Remove

MP3 Tags:

Please make sure the 'tags' on the songs are correct – song name, album, year, genre, artist – as these are used by people who come to KryKey Internet Radio to find a radio station that is playing the music they wish to hear. The correct tags help you by helping others find your radio station. If you don't want others to play the song you upload, then make sure the "share" is not selected. For example if I was looking for the Artist Meatloaf and singing Bat Out Of Hell, if the song is correctly tagged and is playing on your radio station then the search results would display your radio station. Also we are about to add a 'buy now' button to the Player and a listener can purchase the song playing and the radio station will take a percentage of the sale, but this can only happen if the tags are correct. A FREE program to do this can be downloaded at <http://www.mp3tag.de/en/download.html>

Upload Limits:

The current maximum file size of a song is 12Mb and only in MP3 format. As we only stream at 192Kbps, the songs should be converted to this Bitrate (a free MP3 convertor can be downloaded at <http://www.dvdvideosoft.com/free-dvd-video-software-download.htm>) and then the file size will be under the 12Mb for 98% of all songs. For those who need to upload a larger size, we offer a 'File Size Option' (FSO) which will be covered by a subscribed monthly fee. Podcasts are currently limited to 10Mb each. The FSO will also cover large Podcast file sizes. FSO upload limit will be 80Mb per file Song or Podcast. Pay for one month or get a great discount by paying for 12 months.

KryKey Music Library (KML) is next

KryKey Music Library (KML)

All music that has been uploaded and 'shared' by other PRS are in here as seen in the screen shot below.

Sound Library

KryKey Music Library

The KryKey Music Library (KML) is all the music that has been loaded and shared by all the other Personal Web Radio Stations.

B-Boy Shit	1200 Techniques	2004	Consistency Theory	R&B	04:06	<input type="button" value="Add"/>

You can search for songs and when you find the one you want, you click the ADD button and then the song is added to your PRS Music Library to be used as required.

We recommend you look in here for a song you want to play BEFORE you upload it as it will save you time and space on our servers.

Podcast Library (PCL)

All the Podcasts you have uploaded as well as ones that have been 'shared' by other PS are in here. Screen shot below. Podcast name and a description is required and it makes it easier for people to find it to listen to your radio station.

Sound Library Podcasts

The Podcast Library is for uploading your Podcasts. You can share them and also access other Podcasts that have been create and shared by other KryKey Personal Web Radio Stations.

You will see all the Sound Effects that have been uploaded here that you can use in your Studio.

Playlist Library (PLL)

Your Playlists are created, changed, stored and deleted in here.

Playlist	Description	Duration	Scheduled	Shared
US Top 20 - 11 July 2009	US Top 20 - 11 July 2009	01:24:15	00:00:00	True
Land Down Under Music	Aussie Music	00:21:30	7/6/2009	True
UK Top 20 - 5 July 2009	UK Top 20 - 5 July 2009	01:19:29	00:00:00	True
Santana Multi Dimensional Warrior	Santana Multi Dimensional Warrior	02:21:08	00:00:00	True

Playlist	Description	Duration	Scheduled	Shared
Test Playlist	Test	00:19:55	00:00:00	True

To create a Playlist, type in the name and description and then select if you want other PRS to be able to play it. (The start date, time are currently disabled), and then select the "create new" button.

** all technologies, concepts, designs on KryKey Internet Radio are copyright (c) 2006-2011 and are covered under US and EU law **

Then you open the 'Sound Library' tab on the right (blue tab) and this will display all the songs you have uploaded and the ones that have been shared by other PRS. All you have to do is then drag and drop the songs you want in the Playlist.

This is also the same procedure for Podcasts, Promos, Adverts, News and Sound Effects to be added to the Playlist. Then select 'save' and its all finished your first Playlist.

If you now go to the Studio you can open the Playlist Tab and drag the Playlist you created into the PSA to play. The next screen shot displays the 'Sound Library' open and songs in the Playlist.

PRS Page Management

We have designed your PRS Page to be fully adjustable. In the screen shots below you can see all the components on the left that are available or can be changed. You can drag components from the right to the left hand side and you can place them on this page representation anywhere. Page color, text color, background picture can all be done for your PRS Page. Check out the KryKey Test Radio to see what can be done at <http://www.krykey.com/Radio/PRSPage.aspx?id=151>

Currently the Twitter, Blog and Skype components are not active and do not do anything. We advise you add the logo component so when you add you radio station address to your Facebook Status Update for example the logo is available on there.

DJ Management

DJ Management is where you can create a DJ, invite them to play on your PRS. With this DJ Management you can schedule when the DJ has access to Studio 2. Times/Dates are in the UK timzone and in 24 hour format.

Administration
DJ Management

DJ Management is essential to a good web radio station. Create, Change, Suspend & Delete DJ's as required. There are no maximum number of DJ's you can have.

Chat & Scrolling Text Communication Window

At the bottom of the Schedule/Play Area (PSA) you will find the Chat & Scrolling Text Window which when clicked on slides up. This has two sections (see screen shot below), the first is for chatting to your listeners when they visit your PRS page or use the Facebook App, and the second is for creating messages of up to 140 characters to be displayed and scrolled on your PRS page.

The Chat window is easy to use, just type in the text and press 'send'. The Username at the bottom can be changed to what you require. As mentioned this Chat window is connected to your PRS page and the KryKey Facebook App.

The Text window is also easy to use, as you just type in a message (up to 140 characters) and then select the 'add/change' button and then 'save'. Up to 5 scrolling text messages can be added and displayed on your PRS page. You can also send any of these Text messages to your Twitter or Facebook accounts. The text will be displayed on your Facebook Wall. Please note the Twitter feed has been disabled.

This will help you communicate and promote your web radio station.

Facebook Embed Code

If you have a Fan page, then you can use the Embed Code below (change number in **bold red** to the radio station number) in combination using the app (<http://www.facebook.com/apps/application.php?id=190322544333196>). KryKey Internet Radio is also on Facebook and you can find us by going to www.Facebook.com/KryKeyWebRadio – if you require help in creating a Facebook Fan page for your radio station, please email us and we can help.

Embed Your Radio Station In A Web Page

You can Embed your radio station player into a web page by using the following code. You must change the number (we have made it **bold** and in **red** so you can see which number) to the same one as your radio station id which is the last number in the address. Example: <http://www.krykey.com/Radio/PRSPage.aspx?id=126> (the number to use is 126).

```
<div style="width:406px; height:150px;">
<OBJECT id="RadioPlayer"
type=application/x-shockwave-flash
```
